RE: Sewer odor-area of Farm Road 168 and Leawood in
Greene County

Please review the letter to follow from a citizen. Remember when I called you concerning this problem last month (August 11)? Fred Turner of Greene County Resource Management and I had investigated it that morning. Odors appeared to be coming from a storm sewer manhole in front of 3456 West Farm Road 168. You said it may be from an air release valve on the sewer main and to refer all calls about it to Bob Schaffer. I don't know when Mr. Noll wrote his letter but I got it this morning. I didn't know if this should still be referred to Bob due to his new position, so could you please get it to the right person? Thanks and let me know of any new developments in this area. My number is 864-1689.

Janet Hicks

To Whom It May Concern:

I live in the Eldorado Estates Subdivision off of Farm Road 168 West. In existing and arriving at this subdivision I have to pass the intersection of Farm Road 168 West (3480) and Leawood (3800 S.) and there is a repugnet odor of human sewage that is totally almost unbearable, and lingers in your car even after you pass that area. In the heat of the summer it almost makes you throw up. My neighbors agree, and even suggested starting a petition to rectify this. I even asked the builder of some new homes at this intersection how anyone could buy a home in that area and he said that the odor was to be capped and moved down in a field near my subdivision, which does not change the problem. I have wrote to the City Utilities Sewer Department and as yet no answer. I would appreciate any help you can give in fixing this problem as in my estimation it is a health problem. I don't know how the people in that area can live in that smell and if someone would check that neighborhood I'm sure they would verify what I am saying.

Sincerely,

M. Noll
